Have commercial experience with MySQL

PHP

Have Personal and 2 Years commercial experience with PHP

Python

This was my first language and one I am most familiar with, I have both commercial and personal experience with it.

Java

Have experience with Java. Used throughout college

SUMMARY

I'm a twenty-something year old from Dublin, Ireland, and I have multiple talents when it comes to the business of producing and maintaining high quality Digital Media/Communicative Media.

Whether it's creating stunning examples for the Web, I believe in an elegant, clear, simplistic, and well formatted approach to each project I lay my hands on, and I believe that approach can be applied to every aspect of my professional life as well.

By combining my passion for writing, speaking, and designing together I believe I have become a powerful, confident, and expressive communicator. Able to bridge the gaps between every field of I.T. jargon and the Layman and feel confident in expressing my thoughts, opinions, and ideas to those around me.

With a clear history of being an elegant professional communicator, a people person, and a noted extrovert, I eagerly engage myself in any workplace social environment, adapting flexibly to the people and roles around me with a passionate fervor and jovial attitude that some have described as infectious.

In the end, I appreciate people, and with time I feel validated, and comfortable when appreciated.

EDUCATION

2017 - 2019 **MSc (Part-time)**

DIT. Dublin Institute of Technology
Information Technology

2015 - 2017 **B.Sc (Hons)**

Computer Science

College of Computing Technologies
Computer programming and Networking

2013 - 2013 **FETAC LEVEL 6**

College of Computing Technologies
Web Design

WORK EXPERIENCE

Mar 2016 - **Web Developer**

Nov 2017 e-Business Community Development

EBCD: e-Business Community Development is a company that specializes in developing and managing SME's online presence. From SEO to instagram, blog updates to new widgets on their site we take care of all of that in a simple package that we offer to customers.

We build websites using PHP, JS, HTML5, CSS3. These Websites are built for the various CMS available on the market (Wordpress, Opencart, Magento etc...) and per our client's needs. We also perform database management using MySQL. We also develop

custom widgets/modules for clients using PHP which are then used in Opencart/Wordpress.

On a daily basis I also liaise with clients to see what the company could do to improve their business even further. When a client has a suggestion or they want to add a new product or service to their e-business package, I take down the details, communicate it efficiently to the rest of my team, fill in the order form, submit it to sales and management who then give me the green light to begin implementing the changes. I do this across a wide variety of clients from manufacturers to charity shops.

Mar 2015 - **Front-End Web Developer**

Mar 2016 GREIA

Web Developer at (1 year 1 month) we were responsible for delivering a quality website with full functionality to serve as a new medium for Real Estate agents to communicate with customers around the globe.

I worked on the front-end of this site. I used HTML, CSS, JavaScript, to develop a simple prototype. Then after the design and prototype were confirmed we then began to build out the sites full functionality using Angular.

This site also had to have full MLS integration as it was going to be used with multiple MLS systems around the globe e.g. Zillow API, proxio API etc. So We normalize every MLS into a standardized JSON API with RESTful endpoints

Dec 2014 - **Web Developer**

Jan 2016 Arlix Technologies

Web Developer at (1 year 2 months) Building an online learning platform to help users learn whatever it is they wish to learn. Similar to Lynda.com but content is crowd sourced.

Worked on very basic front-end development using HTML, CSS, Javascript. I also did a lot of wireframing and design. I also learned how to use Photoshop during my time here.

Jan 2013 - **Freelance Web Developer**

Jun 2013 Community College

Freelance Web Developer at Ardgillan (6 months) Simple website for my former school. Used WordPress framework to manage content easily also integrating e-portal into their site and setting up a mail server.

AWARDS

Griffith College Scholarship
2015

I won a full scholarship to study Computer Science at Griffith College in Dublin. This was very difficult as I had to prove my knowledge of computers and my prior interest in the I.T. industry.
